DETAILED ACTION

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-15, drawn to a method for predicting a patient with chronic lymphocytic leukemia the **refractory to treatment** with **rituximab** by analyzing the cell having abnormalities of deletion in chromosome by FISH and a diagnosis kit, classified in class 435, subclass 6 and class 436, subclass 64..
 - II. Claims 2-12, and 16-22, drawn to a method for predicting a patient with chronic lymphocytic leukemia the **respond to treatment** with **rituximab** by analyzing the cell having abnormalities of deletion in chromosome by FISH and a diagnosis kit,, classified in class 435, subclass 6 and class 436, subclass 64.
 - III. Claims 23-30, drawn to a method for predicting a patient with chronic lymphocytic leukemia the **respond to treatment** with **alemtuzumab** by analyzing the cell having abnormalities of deletion in chromosome by FISH, classified in class 435, subclass 6 and class 436, subclass 64.

Claim 1 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1 upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions **shall** be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/ are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no

longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Invention I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Invention I, III, and IV are unrelated because each invention have different treatment effect and have different modes of operation. Therefore, each invention may need different patient population and biological samples from different patients. Invention I is method for predicting a patient with chronic lymphocytic leukemia the **refractory to treatment with rituximab**, it needs to obtain a biological sample from a cancer patient with refraction to the treatment. Invention II is a method of predicting a patient with chronic lymphocytic leukemia the **response to treatment with rituximab, it needs to obtain a sample form the patient, who respond to the treatment** and invention III is method for predicting a patient with chronic lymphocytic leukemia the **refraction to a treatment with alemtuzumab**, the method requires a sample from a patient treated with **alemtuzumab**.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the search required for each group is not required for the other groups because each group requires a different non-patent literature search due to each group comprising different products and/or method steps, Therefore, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See M.P.E.P. 804.01.
